Wear Shuellas And Keep Your Shoes From Getting Soaked

Just a few weeks ago, one of our writers said something to the effect of "I wish there was a little raincoat I could put over my shoes to walk around outside."

And then, as often happens, an e-mail about a little raincoat for your shoes showed up in my inbox. It's called the [Shuella](#), and it comes in four colors.

Frankly, I thought these over-your-shoe galoshes would look a little silly, but they basically just look like galoshes. The added bonus: When you go inside, you can wipe them off with the included cloth, fold them away into the included pouch, and make them disappear until you venture back into the rain. There's even a heel pad so those stilettos won't poke holes in the rubber

A fit tip: order true to size – they'll still be big enough to cover your shoes or booties.

Get Yours: \$49.95 at [Shuella.com](#)
